

Task description

You and your interlocutor are presented with the following task: For each participant, a few cubes are placed on the table or floor in front of you, each with a colored symbol or shape on it. The cubes are arranged in such a way that a symbol is visible only to one of the participants. **The task is to identify three different shapes through communication with your interlocutor, that is, to find those symbols that are visible in this exact form only to one of you.** Please mark the identified shapes by touching the corresponding cubes. Please move exclusively in the marked half of the room and do not cross the yellow line during the experiment! The test phase ends after 5 minutes or as soon as the task has been correctly solved.
